PROFILE SUMMARY

Frontend Developer with a strong foundation in computer science and experience in web development. Skilled in JavaScript, React, HTML, SCSS, and Tailwind CSS with proficiency in using CMS tools like Umbraco. Adept at collaborating with cross-functional teams to deliver user-friendly and visually appealing web solutions. Demonstrated ability to manage and maintain websites, improve performance, and ensure seamless user experiences across various devices and browsers.

KEY SKILLS

- **Web Development:** JavaScript, React, HTML, SCSS, Tailwind CSS, React Icons
- **State Management:** Redux
- **Version Control:** Git
- **Content Management System (CMS):** Umbraco

WORK EXPERIENCE

Front End Developer (Remote)

Senior Internet Limited, United Kingdom

May 2023 – Present

- Developed and implemented responsive design to improve the user experience, ensuring websites were accessible and functional across various devices and browsers.
- Revamped a client's website and integrated Umbraco CMS to make the website content easily manageable for the client, improving their ability to update and maintain the site content independently.
- Collaborated within cross-functional teams, including back-end developers, designers, and project managers to deliver cohesive and high-quality web solutions.
- Performed regular maintenance on client websites to ensure optimal performance and user experience, improving website functionality and reliability.
- Maintained open and effective communication with clients to understand their needs, provide updates, and gather feedback for continuous improvement.
- Worked closely with marketing, sales, and customer support teams to gather requirements, understand business objectives, and deliver solutions that align with client expectations and company goals.

Front End Developer

The Bulb Africa, Lagos

October 2022 – May

2023

- Worked in a cross-functional team consisting of 2 front-end developers, 2 back-end developers, and 2 DevOps engineers to build and deploy an intuitive and user-friendly hospital management system.
- Played a key role in creating visually appealing and user-friendly interfaces, enhancing user experience through meticulous front-end development practices.
- Implemented websites and landing pages from initial concepts through to deployment, ensuring a seamless user experience and responsive design for cross-platform compatibility.
- Applied best practices in code optimization and performance enhancement, which improved loading times and ensured efficient resource usage.
- Communicated and collaborated with back-end developers and DevOps engineers to integrate front-end components with server-side logic and ensure smooth deployment processes.
- Participated in regular team meetings and code reviews, contributing to continuous improvement and knowledge sharing.

EDUCATION

Mountain Top University
BSc Computer Science

December 2020
